Native French - Fluent in English

As a passionate, expert front-end developer, I design scalable architectures and high-performance design systems. Combining technical rigor with a product vision, I optimize UX/UI, manage complex states, and guide teams toward technical excellence.

Experience

Front-End Developer

OneStock (2023 - present)

- Architecture & Core: Component-oriented front-end technical leadership (Strict TypeScript, Monorepo).
- Design System & UI: 1.5 years as Design System Lead, designing and integrating accessible components, optimizing UX/UI, integrating Figma Design Tokens, ~30 components published
- Data & State: Managing Complex Global States and Strict Data Validation with Zod
- Quality & Mentoring: Code reviews, implementation of unit tests (Vitest), CI/CD modernization and technical support, mentoring of 3 people

Web Developer

Wiseas Connect (2021)

- Building an application from scratch using HTML, CSS, PHP, SQL, and Ajax

Digital Communications Assistant

Lycée Fernand Leger / Etienne Coffee
(2019 - 2020)

- Creation of digital marketing materials and websites using WordPress, custom plugins, and the Adobe suite
